

**Senior Vice President, Director of Fixed Income
Bissett Investment Management - Calgary, Alberta**

SVP, Director of Fixed Income

For over twenty five years, Bissett Investment Management has been applying a disciplined team approach to managing mutual funds as well as equity, fixed income, and balanced portfolios for institutional clients.

We are currently seeking a well-rounded, experienced industry professional to lead and manage our Fixed Income Group.

Reporting to the President of Bissett Investment Management, the SVP, Director of Fixed Income, will champion a well-defined fixed income strategy that is competitive in both the retail and institutional marketplaces.

You will lead and collaborate with the Fixed Income team to manage and develop the various portfolios as well as the associated research and oversee the existing strategies that set us apart from other Fixed Income teams in Canada. Your fresh perspective and valued experience will assist us in ensuring that our Fixed Income products continue to evolve and be viewed as a leader in the market.

You are an experienced strategist, accustomed to meeting and exceeding performance and market norms. You have a track record as a great leader, and embrace team involvement. You are aggressive in nature, but not abrasive in style.

You will have experience as the lead manager for a medium to large-sized investment management team. You will also be a sitting member on the Bissett Investment Committee.

Key Duties & Responsibilities:

Portfolio Management

- Actively manage assigned portfolios, including maintaining portfolios and appropriate models
- Participate and lead investment research meetings
- Champion the decision making process with respect to the ongoing management of the group's different portfolios
- Develop and recommend fixed income products
- Work closely with traders in executing trades and trade functions
- Complete and maintain quantitative analysis on portfolios
- Possess strong quantitative, analytical and credit research skills
- Have a solid working knowledge of derivative instruments

Research/Analytics

- Working with the team you will ensure that the research and analytics are performed on all allocated names and sectors
- Prepare initiating reports on prospective investments
- Prepare quarterly updates and ongoing analysis of investments

Client servicing

- Prepare quarterly and ad-hoc client reporting
- Attend client meetings to discuss investment strategy and performance as well as general economic trends
- Assist various teams in developing new business opportunities

As the qualified candidate, you possess:

- 15 plus years of experience in Fixed Income Portfolio Management
- Strong presentation and communication skills (written and verbal)
- Demonstrated analytical skills
- CFA designation
- A University Degree (preferably in finance)

You should also have:

- Accounting experience (preferably with financial statement analysis)
- Experience with Bloomberg, PC BondData and other Portfolio Management systems
- Data modeling experience

Moderate travel is required
