

Mawer Investment Management Ltd. (www.mawer.com) is the largest independent money manager in Alberta, providing portfolio management for private clients, institutions and mutual funds. Assets under management are approximately \$7.3 billion. Due to continued growth, the Firm is seeking an individual for the following position in Calgary:

FULL-TIME RESEARCH ANALYST

The research analyst will assist both fixed income and equity portfolio managers in the research process which includes: generating investment ideas, analyzing corporate news & public documents, interviewing management, building discounted cash flow models, and making recommendations for the purchase and sale of investments. The analyst will also assist in the reporting, sales and marketing, and compliance of equity and fixed income products. This is a generalist role that provides exposure to a broad array of industries within both domestic and international asset classes.

Candidates should demonstrate a passion for investment management, expertise in Excel, and familiarity with financial statement analysis. Required skills also include strong analytical ability, and superior speaking and writing skills. Knowledge of VBA and fluency in a second language would be assets. Candidates should be completing (or have) an undergraduate degree and be prepared to enroll in the CFA program.

Applicants should provide their résumé, a cover letter, latest university transcripts, and a short essay (400 word limit) explaining why they want to be an investor and describing the areas outside of investing in which they excel. Please send all application materials via email to info@mawer.com by September 22, 2010, and include your first name, last name, and reference number **092210-RA** in the subject line. Only applications that include all required materials will be considered.

No telephone inquiries please. We thank all applicants and advise that only those selected for an interview will be contacted.
