

FINANCIAL ANALYST

STEMCELL Technologies Inc is a leading supplier of tissue culture media, cell separation reagents and contract assay services for life science research. STEMCELL is committed to developing and delivering products and services that are high quality and innovative, and which become the world standard. We are privately held, profitable and stable, with an average annual growth rate of twenty percent. Based in Vancouver, STEMCELL is the largest biotechnology employer in British Columbia with over 300 employees globally. Products are shipped from our distribution centres in Vancouver (Canada), Seattle (USA), Grenoble (France), Sydney (Australia) and Singapore to our offices and distributors in over 70 countries. We maintain close relationships with our research colleagues in both academia and industry, and see ourselves simply as "scientists helping scientists". We are always looking for the brightest and the best to join us. Currently we have an opening for a Financial Analyst.

The Financial Analyst is accountable to the CFO and is responsible for providing regular and ad-hoc financial analysis and support for a wide variety of departments and special projects across the company globally.

Duties:

- Develop and maintain a working knowledge of STEMCELL operations globally, understanding the business objectives and issues of assigned groups to provide added-value financial analytical support; coach and mentor non-Finance staff on financial matters to improve operational reporting and decision-making
- Participate in and support the preparation of annual operating plans and budgets
- Support Product Managers and other key stakeholders to the prepare and/or update of business plans for products and/or product groups globally
- Perform financial statement and other ad-hoc analysis
- Research, review and summarize external reports (public company regulatory filings, analyst reports and the like) to support management decision-making around capital resource allocation
- Act as a key team member in assigned systems improvement projects, both technology solutions and process improvements
- May support the negotiation and structuring of a variety of commercial agreements

Qualifications:

- CA, MBA CFA or other financial qualification
- 5-8 years relevant experience
- Science or engineering background a strong asset
- Strong business acumen, analytical and problem-solving skills
- Proven ability to communicate with and effectively coach non-financial colleagues
- Ability to work in a fast-paced, collaborative environment, requiring significant cross-functional coordination and teamwork

This is an opportunity to work with highly motivated colleagues in a science-oriented, creative and dynamic environment. We offer a competitive salary, excellent benefits and significant career development opportunities. If you are interested in this challenging and rewarding position, please e-mail your resume, together with a one page covering letter describing your career goals and interests, to:
